### **Dark Skies ESD Art Installations Burns Protocol**

- \* All installations will be burnt on a burn platform high enough to prevent baking of the playa. Smaller burns can be done on simple aluminum sheeting if it is determined by the ESD that it will not scar the playa.
- \* All art burns will be scheduled with emergency services to allow rangers and staff to prepare.
- \* All art burns will have all available ESD, Dark Skies rangers, and Dark Skies Manager On Duty on hand to form a safety circle around the burn.
- \* All art burns will only be ignited in winds not exceeding 25 mph final call will be made by fire chief.
- \* All burns will have a safety barrier of 1 1/2 times the height of the object to be burned never less than 40 ft.
- \* All burns will only happen after taking all precautions needed to keep all participants safe.
- \* All accelerants must be pre-approved.
- \* All burns will comply with NFPA 160 Guidelines and requirements.
- \* All questions and comments contact BIG E @ [fire@theDark Skiesevent.com](mailto:fire@theDarkSkiesevent.com)
